

## How to Delete a Turnitin Assignment for a Student to Resubmit after the Due Date

To delete a student's Turnitin assignment submission so they can resubmit the assignment after the due date\*,

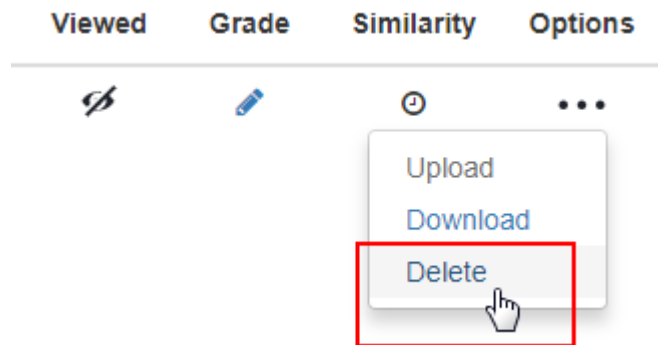

1. Find the student's submission to delete. You can do this by searching for the student by name in Turnitin's search bar.

Here is a zoomed-in example.

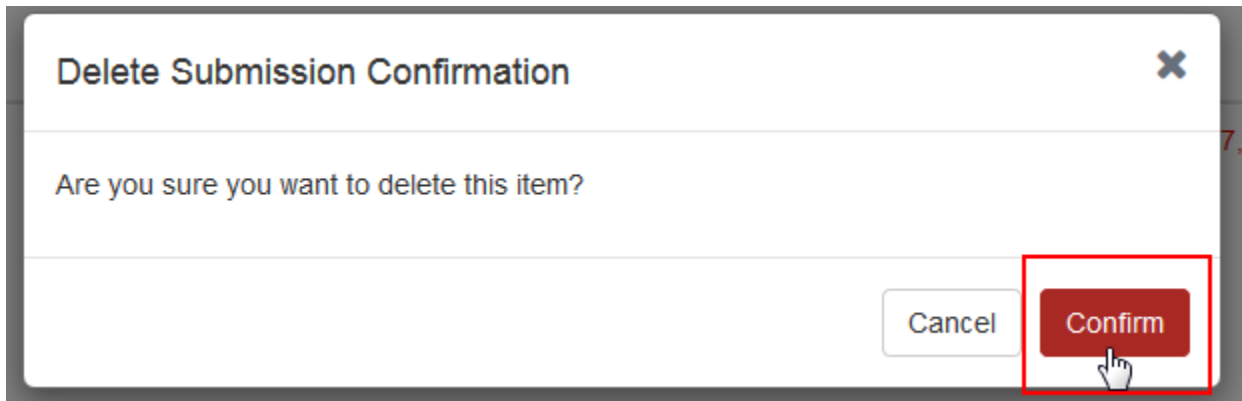

2. Once you find the student's submission to delete, click on the ellipses icon (“...”) that appears on the right side of the submission listing under “Options.” Then, click on **Delete** in the drop-down menu that appears from the ellipses icon.

\*Turnitin does not allow resubmissions after an assignment's due date. To have a student resubmit after a due date, you must delete their original submission.

3. Click on **Confirm** to delete the student's assignment submission.

After you click on **Confirm**, the page will refresh, indicating that the student's assignment submission has been deleted. Once the assignment submission has been deleted, the student can resubmit the assignment.

**Important:** Please note that any submission after a due date will be marked "late" in Turnitin. This "late" status only indicates that the assignment was submitted after the due date and would not confer a grading penalty via Turnitin. The decision of whether or not to penalize a late submission is within the purview of whomever grades the submission, and Turnitin, just like Canvas assignments, only shows that a late assignment was submitted after the due date and does not automatically penalize the student for submitting late.
